

Pega Environment Setup & Application Creation Guide

National Internship Program (NIP) · Pega Academy · 2026

Note: Use the application name, case types, data types, persona and business context based on the assigned project.

Step 1: Access the Exercise

- To begin the project, use the following link: <https://academy.pegasoft.com/mission/business-architect/v8/exercise>
- Log in using your registered Email ID.

Step 2: Initialize Pega Instance

- Click the button **"Initialize Pega instance for this Mission Exercise."**
- The initialization process may take up to **5 minutes**, so please wait.

You must initiate your own Pega instance to complete this Mission Exercise.

Initialization may take up to 5 minutes so please be patient.

[Initialize Pega instance for this Mission Exercise](#)

NOTE: Always use the button(s) above for this Mission Exercise. Directly bookmarking a Pega instance may launch the wrong environment. Do not exceed two Mission Exercise instances at a time. Launching a third instance, even in a new tab, can cause a loss in progress.

For help managing your Pega instance, see our [FAQs](#)

Step 3: Wait for Instance Setup

- A screen will appear indicating that the Pega instance is being prepared.
- Please wait until the system automatically refreshes.
- If it does not refresh, manually refresh the browser after a few minutes.

We are now preparing your Pega instance.

Please be patient as it may take 3-5 minutes. This page will automatically refresh when your instance is ready to launch. If this page does not automatically refresh in 5 minutes, click the browser refresh button to manually refresh this page.

For Pega instance expiration and policies, visit our [FAQs](#).
If you are having additional problems, please [contact the Pega Academy team](#).

Step 4: Launch Pega Instance

- Once the instance is ready, click "**Launch Pega instance for this Mission Exercise**".
- This will redirect to the Academy Exercise system.

Your Pega instance is ready!

Click the launch button below to open your Pega instance in a new browser tab. This instance will terminate after 7 days.

Step 5: Log in to Pega Platform

Use the following credentials:

Role	Username	Password
Business Architect	author@uplus	pega123!

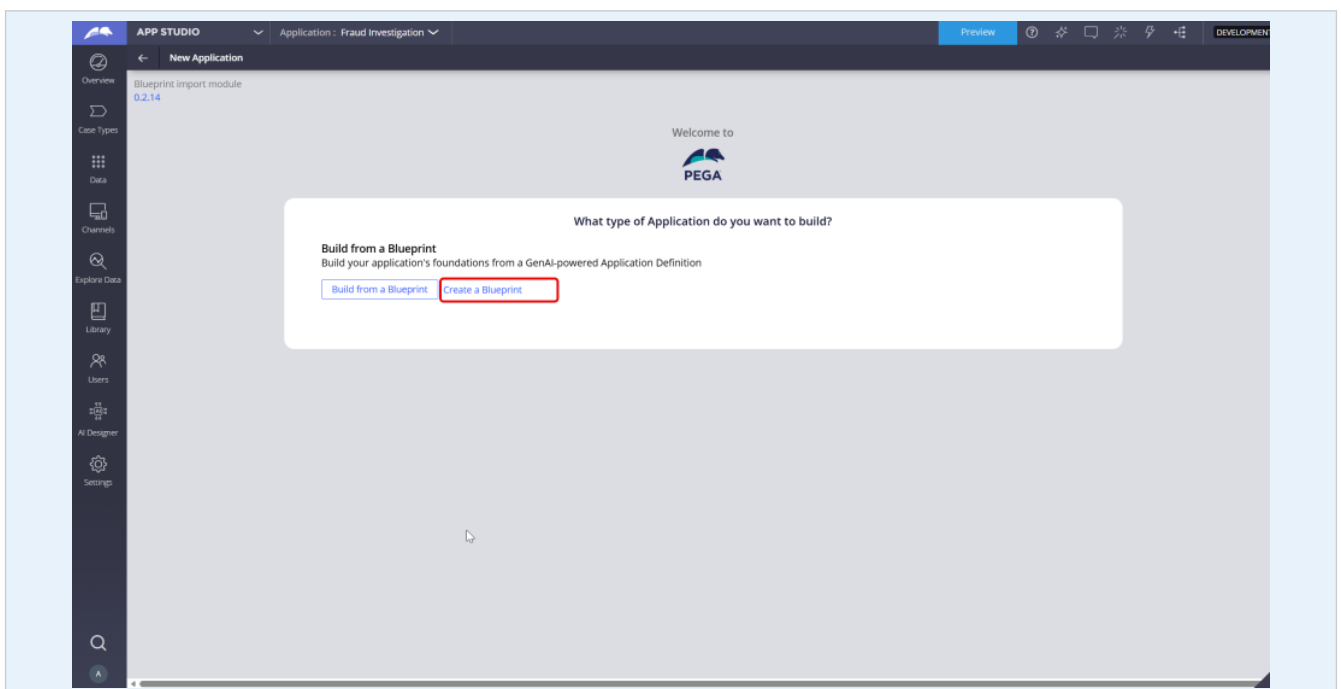

Step 6: Create a New Application

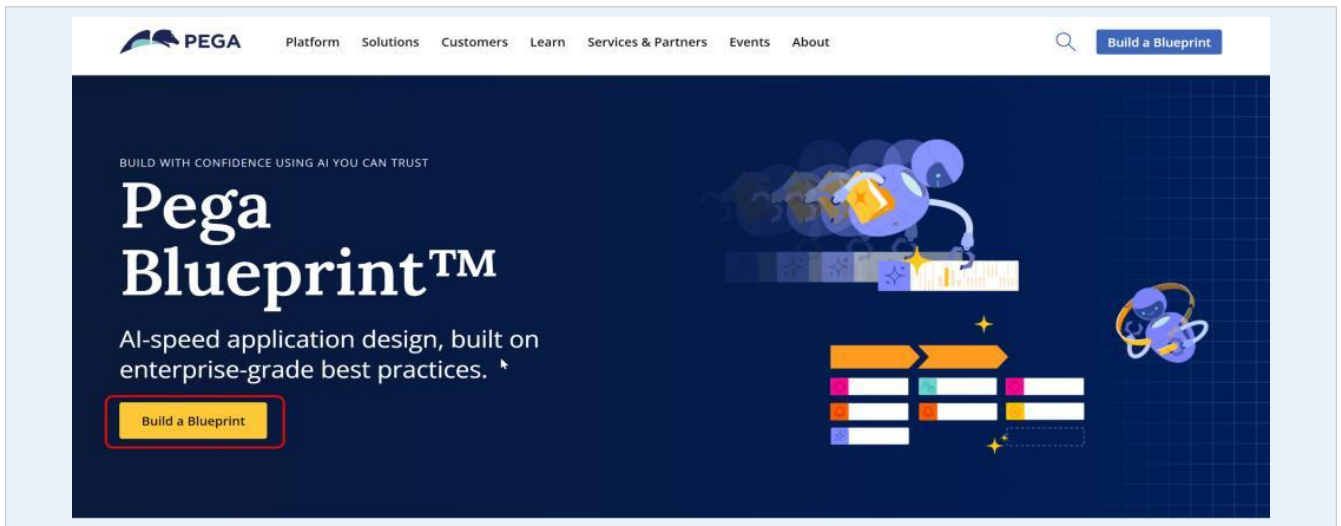

- After logging in, go to the **Application** menu.
- Select "**New Application**".

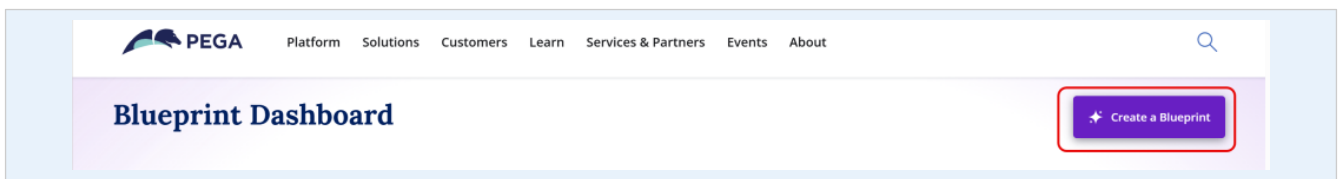

Step 7: Create Application Using Blueprint

- Choose the option **"Create a Blueprint"**.
- This will redirect to the Pega Blueprint portal, click **"Build a Blueprint"**.

Then select "Create a Blueprint".

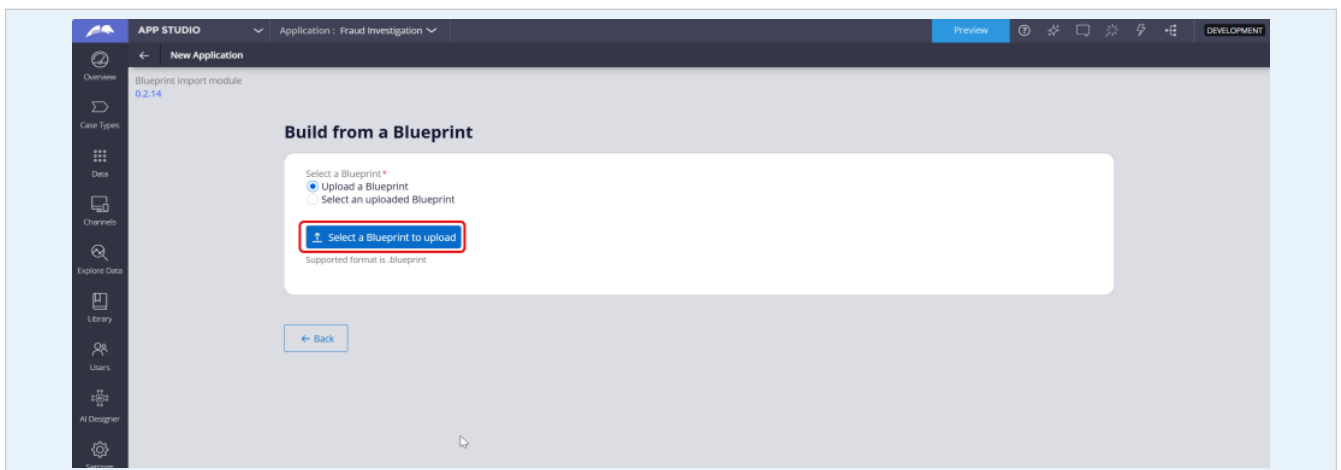

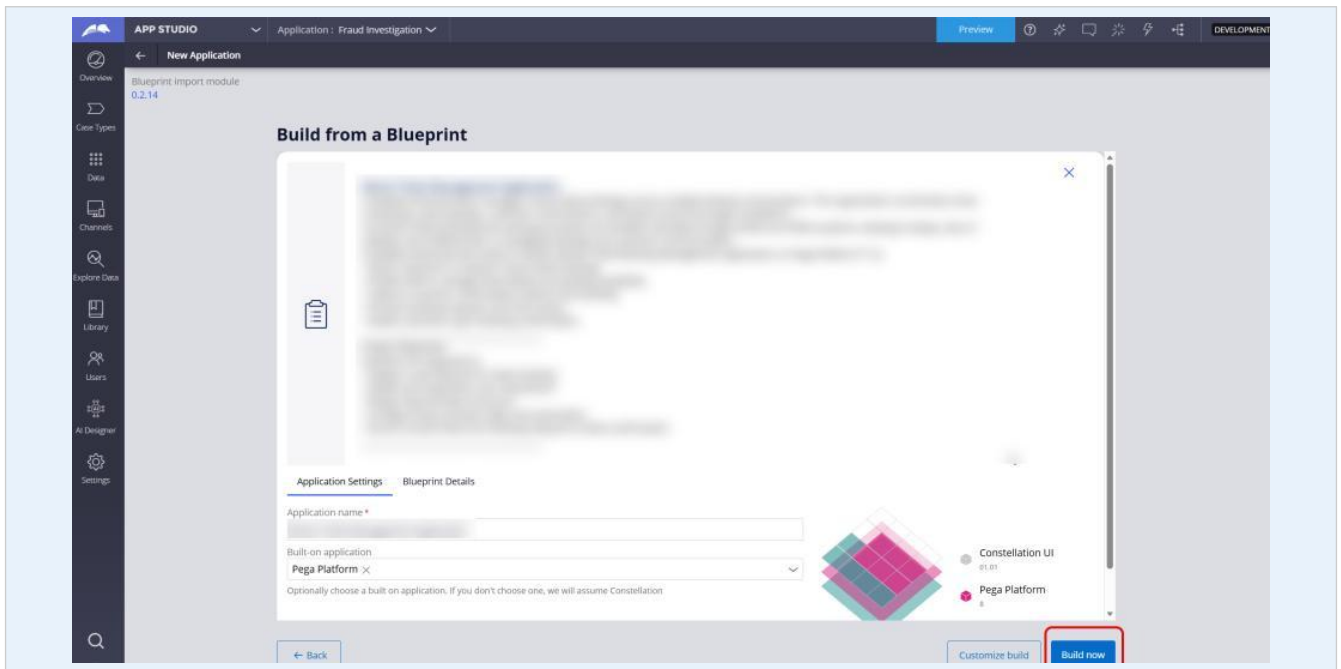

Step 8: Design the Blueprint

- Create the blueprint based on the assigned project and business requirements.
- Once completed, **download the blueprint**.

Step 9: Build Application from Blueprint

- Return to **App Studio**.
- Click "**Build from Blueprint.**"
- Upload the downloaded blueprint file.

Step 10: Configure Application

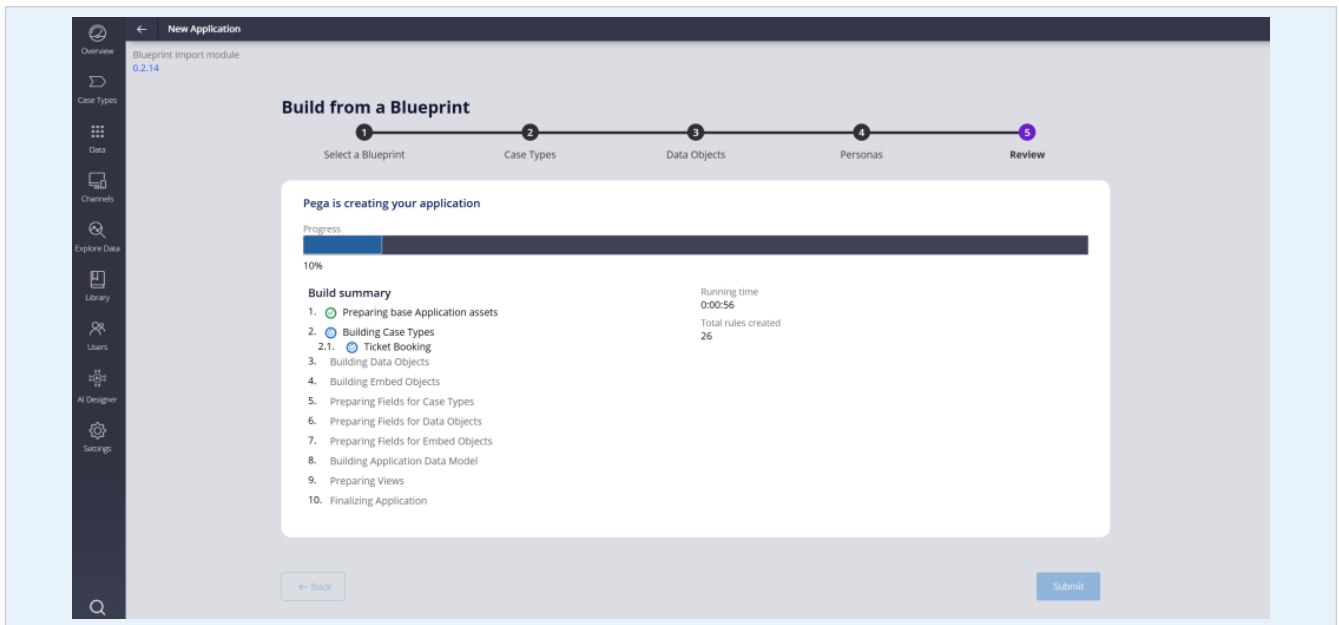

- Click "Build Now."

Review and update application details such as:

- Application Name (based on the assigned project)
- Organisation details

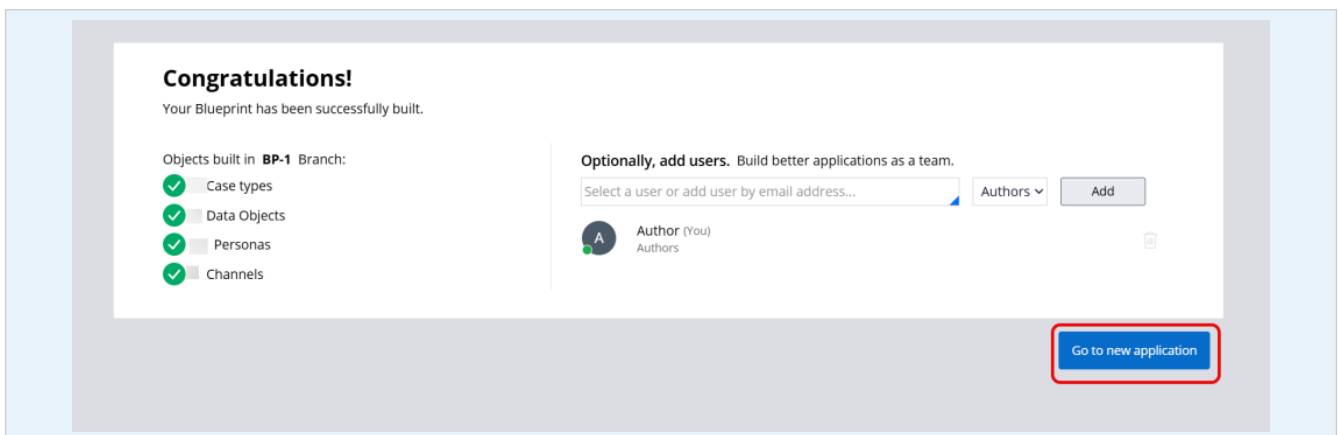

A screenshot of the 'Application Settings' form in Pega Studio. The form is divided into several sections. The 'Application Settings' section includes 'Application ID' and 'Version' (01.01.01). The 'Base language' is set to 'English EN (United States)'. The 'Organizational settings' section includes 'Organization name', 'Division name', and 'Unit name'. The 'Class layers' section has a checkbox for 'Generate division layer'. The 'Class group name' is set to 'Work'. There are expandable sections for 'Case classes' and 'Data classes'. At the bottom, there are 'Back' and 'Submit' buttons. The 'Submit' button is highlighted with a red rectangle.

Click "Submit" to proceed.

Step 11: Application Creation

- Wait for the application to be generated.
- Once the application is generated, click **"Submit"** to finalise the process.

Step 12: Launch Application

- Click **"Go to new application."**
- The application will open and is ready for use.

Final Step: You are now ready to start working on your project.
